## TEACHING AND OUTREACH

**Founder and Coordinator, Stellar Students Seminar Series, University of Colorado Boulder**
**Summer 2026 – Present**
Created a seminar series targeted toward the large undergraduate student body in the Astrophysics (APS) department at CU Boulder. Designed to introduce undergraduates to ongoing research done by APS graduate students and teach useful professional development skills.

**Lead Graduate Fellow, Center for Teaching and Learning, University of Colorado Boulder**
**Spring 2025 – Summer 2026**
Served as liaison between the APS Department and the Center for Teaching and Learning. Helped instructors earn the Certificate of College Teaching, conducted classroom observations, organized teaching orientation for incoming graduate students, gave workshop for Fall Intensive.

**Instructor, Physics, University of Colorado Boulder**

**Fall 2025** Fundamentals of Scientific Inquiry

Co-instructor of record for PHYS 1400, a class designed for first-year undergraduates who perform original research in physics or astrophysics and present their project to the department at the end of the semester. Designed the course syllabus, coordinated graduate student research mentors, oversaw student projects, gave lectures on practical research skills.
